Election/Restrictions

2. This application is in condition for allowance except for the presence of claims 8-10 directed to an invention non-elected without traverse. Accordingly, claims 8-10 have been cancelled.

Allowable Subject Matter

- 3. Claims 1-7 and 11-13 are allowed.
- 4. Regarding claim 1, the prior art does not teach or make obvious the use of
 - a first current density is set to at least one section of the active layer
 and a second current density is set to at least another section, the first

current density being lower than a current density at a cross point and the second current density being higher than the current density at the cross point,

within the context of claim 1 taken as a whole.

5. Regarding claim 3, the prior art does not teach or make obvious the use of

current is supplied at a same current linear density to the sections
 belonging to the same group and current is supplied at different current
 linear densities to the sections belonging to different groups.

within the context of claim 3 taken as a whole.

6. Regarding claim 13, the prior art does not teach or make obvious the use of

 injecting current into at least one other section different from the first section at a current density such that the gain coefficient of the quantum structures at the longest transition wavelength becomes smaller than the gain coefficient at the second longest transition wavelength.

within the context of claim 13 taken as a whole.
